Different Stakeholders

Different Perspectives

Are you facing these challenges with your GRC Tech Stack ?

Integration Gaps

Did you implement a regtech solution to address an urgent problem, only to face unforeseen integration issues with your upstream and downstream systems?

Premature Investment

Did you invest in a unified GRC platform before your strategy had matured, leaving you without critical functionalities or missing key modules?

Fragmented Tech Ecosystem

Are you struggling to align disparate tools and systems in your GRC stack, leading to inefficiencies and compliance risks?

Emerging

CLIENT PROFILE

- **ORGANIZATION CHARACTERISTICS**
- Smaller regional banks or fintech startups
- Focused on rapid growth, innovation and customer acquisition
- Limited or newly implemented compliance and risk frameworks
- **GRC NEEDS**
- User-friendly, cost-effective solutions
- Tools to manage foundational compliance (AML, KYC, PCI-DSS)
- Easy integration with existing platforms like core banking systems or payment processors
- Scalable solutions to grow alongside the business

CHALLENGES

- Limited staff specializing in compliance and risk
- Balancing regulatory compliance with innovation and agility
- Pressure to meet emerging regulatory demands without overburdening resources
- Establish a structured GRC foundation to meet regulatory expectations
- Automate repetitive tasks to free up resources
- Gain visibility into risks while ensuring customer trust

EVONEXT SUITE

- Cost-Effective
- Modular approach
- Flexible to integrate with other applications
- Available with enterprise features
- Scalable to meet growing needs

Mature

CLIENT PROFILE

- **ORGANIZATION CHARACTERISTICS**
- Established financial services providers or banks with regional database
- Strong compliance history and structured risk management processes
- Limited international presence, focusing on local or national markets
- **GRC NEEDS**
- Comprehensive, customizable platforms to address complex workflows
- Advanced reporting for internal use and external regulators
- Tools to align enterprise-wide risk management with business objectives
- Emphasis on automating compliance checks and ensuring real-time insights

CHALLENGES

- Navigating evolving local regulations while maintaining operational efficiency
- Collaboration between departments in a non-global but multi-regional setup
- Managing high volumes of data while ensuring data privacy and security compliance
- Optimize and centralize GRC efforts to ensure consistency
- Predict and mitigate risks using advanced analytics
- Strengthen trust with stakeholders through transparency and efficiency

EVONEXT SUITE

- Build on top of other existing solutions
- Flexible to integrate with other applications
- Highly customizable
- Cater to large stakeholder departments
- Audit-Ready

About EvoNext

EvoNext's journey started in March 2022.
Software suite to GRC challenges.

Enterprise customers helped us remain bootstrapped

Enterprise-rich features; features; workflow management solution

Future towards Full Automation and Integration

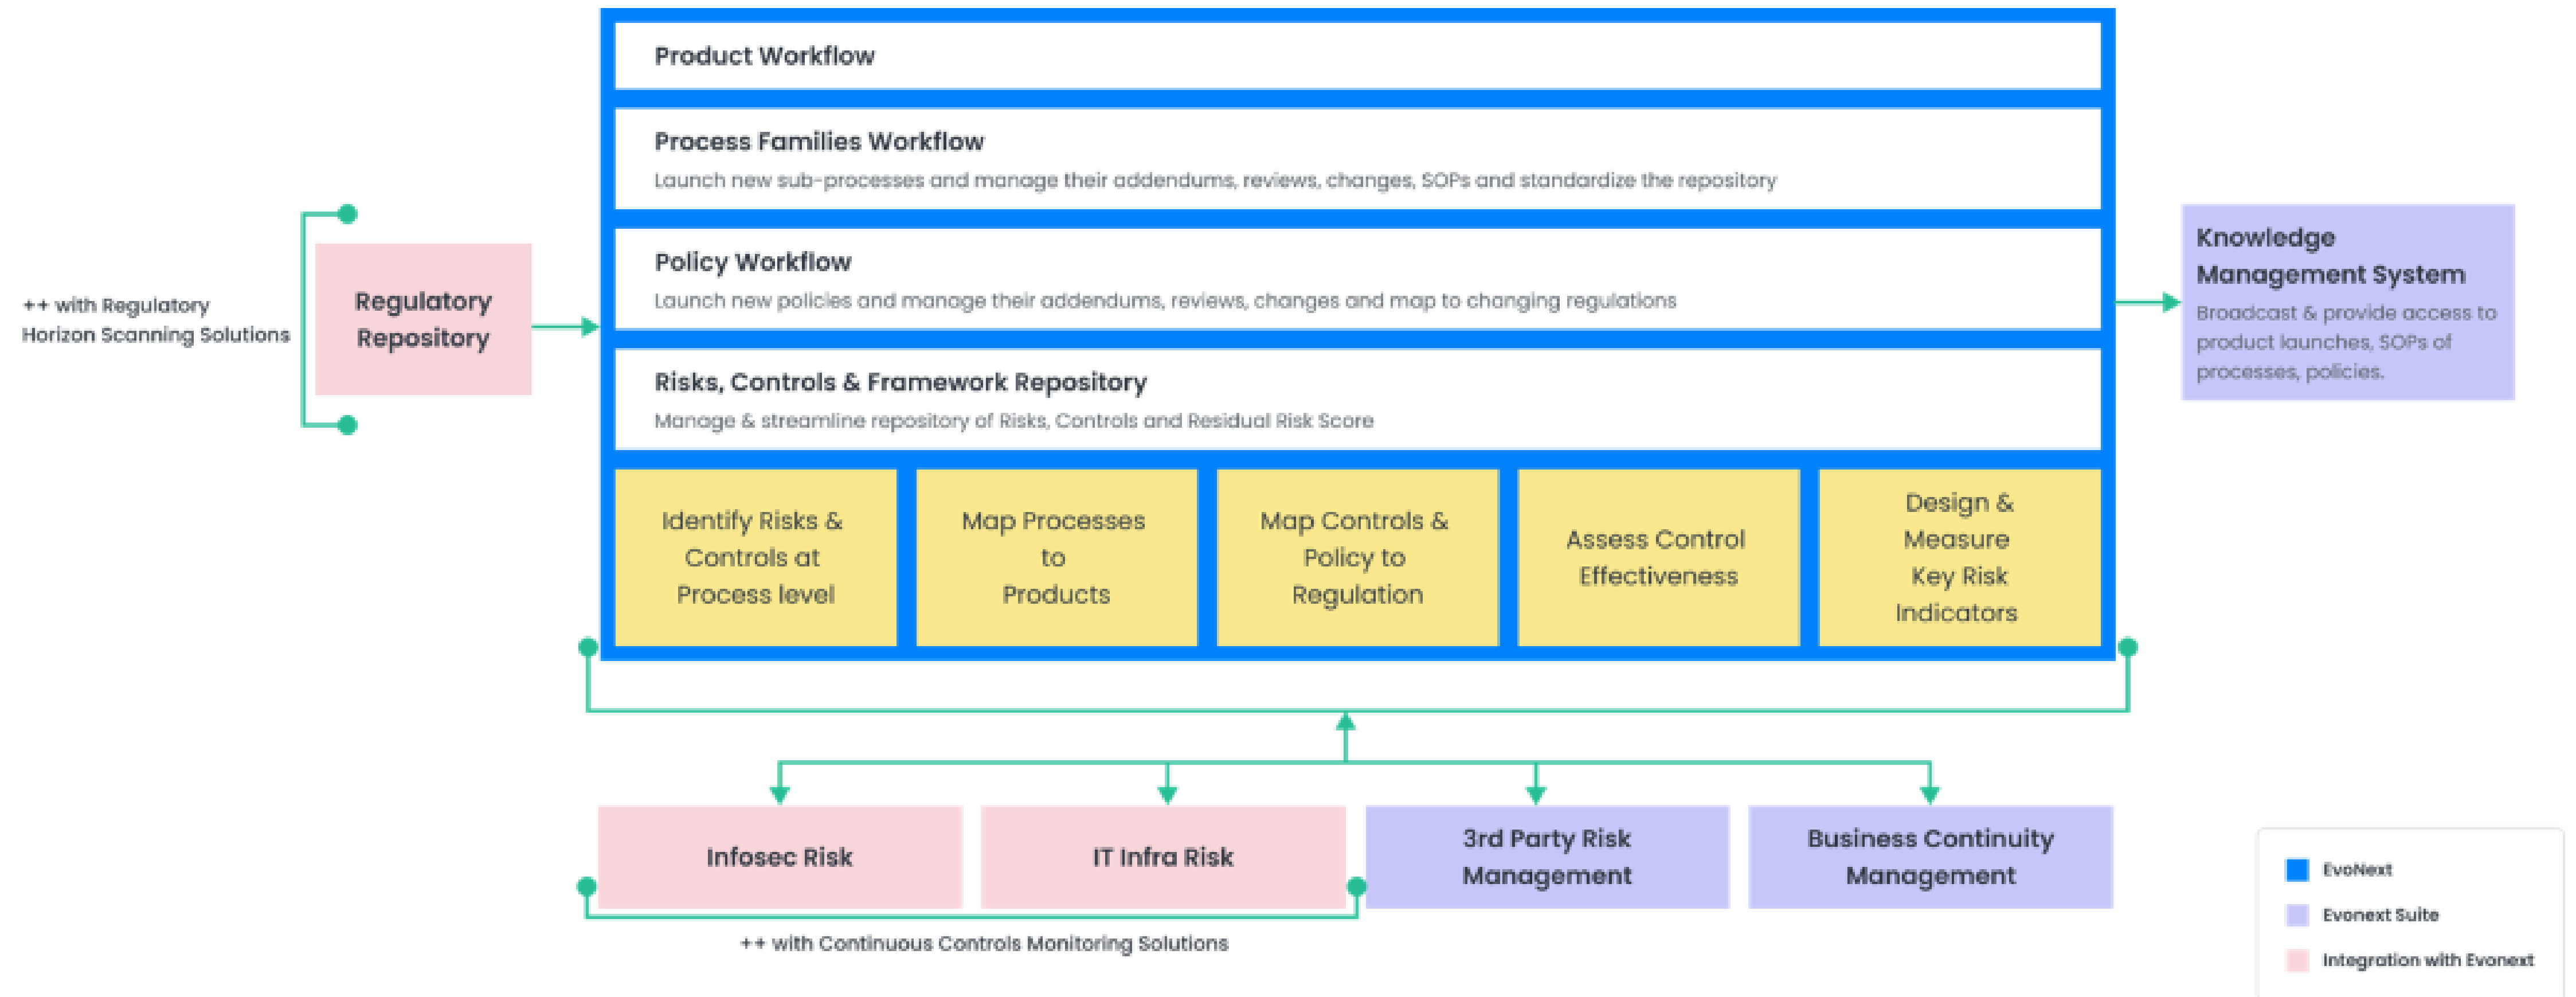

Focused on BFSI & Fintech (regulated industries)

Flagship product - Product Change
